
TY550 Automatic Foil Stamping Machine

This machine is a latest automatic foil stamping equipment which is widely used in foil stamping many kinds of paper and other flat materials, such as the invitation card, name card, red pocket, package paper boxes etc. It can make the products more personalization and more exquisite.

Features:

1. PLC Controlled, easy to use, only need one operator.
2. Hot stamping pressure, temperature and stamping time can be adjusted flexibly.
3. The feeding rail can be adjusted horizontally and vertically, which is simple and time-saving.
4. The lifting of the stamping plate can be fine-tuned through the touch screen input.
5. Servo motor is used for paper feeding and collecting, photoelectric positioning, high precision.
6. Automatic lifting of receiving table.
7. Safety protection switch, which automatically stops machine when someone approaching the dangerous area.

Main Technical Parameters:

	Model	550
1	Stamping size	280×260mm
2	Paper size	MAX: 550×500mm
3	Material thickness	100g/m ² --3mm
4	Mechanical speed	≅ 35pcs/min
5	Pressure	About 1.5Ton
6	Paper stacker height	500mm
7	Paper collector height	500mm
8	Foil groups	1 roll
9	Foil width	Max. 260mm
10	Main motor	2 kW
11	Power	4kw/220v 1phase
12	Air supply	0.6MPa
13	Machine weight	650kg
14	Machine dimension (L×W×H)	L1700×W1150×H1600mm

Remark:

- The working speed is related to the material size and quality.
- Technical specifications are subject to change without prior notice.
