## ML1100 Die Cutting Machine

Our die cutting machine is an indispensable piece of post press equipment which is widely used for die cutting, and creasing of adhesive stickers, carrier bags, book covers, packing boxes, greeting cards, desk calendars, corrugated cartons, etc. It can effectively cut the desired material into large numbers of the same shape.

### Features

1. Our die cut machine is manufactured using high quality material for high strength
2. It adopts a 3-step helical gear mechanism, resulting in stable operation, large cutting force, and low noise.
3. Single disc electromagnetic clutch ensures agile, reliable operation
4. Reasonably designed operational altitude, moving bed with a large open angle.
5. Electrical system is designed in accordance with IEC standard.
6. Single sheet die cutting, continuous die cutting operations, adjustable delay range
7. Reliable safety system ensures operator safety.

### Advantages

1. Our die cutting machine uses centralized lubrication pump system
2. It adopts world famous brand electrical components
3. Strengthened construction ensures smooth operation and long service life.
4. The adoption of active plate frame makes it convenient to install die cutting rule and adjust pressure, producing clear and beautiful results.

**Specifications**

Name	
Model	ML-1100
Inside chase (mm)	1100×800
Max. die cutting size(mm)	1100×800
Speed (cuts/min)	23±2
Max. rule length (m)	≤30
Power main motor (kw)	5.5kw6pole
Photoelectric sensor	Imported from Japan
Gross weight (kg)	4500
Dimensions (L×W×H) (mm)	2080×1950×1900
